

Absolutely fool-proof installation!

Only the RB Clip Gun System gives you perfect, error-free installations into any wooden surface – every time. No staple nicks, no pinching, no compression, no accidental damage from hammer blows or kinked staples. The lightweight clip guns are easy to load and shoot, applying perfectly sized clips that will never deform the cable or wire, or compromise the signal.

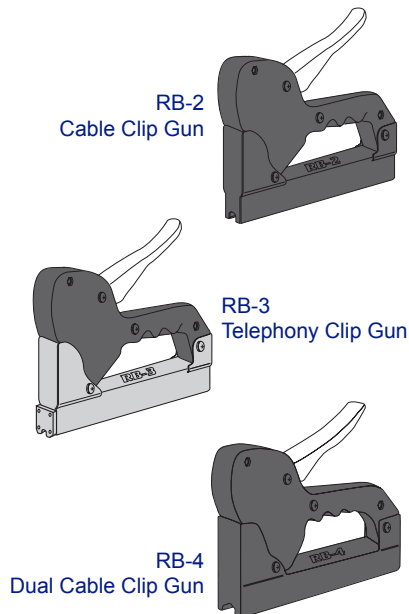

High-density polyethylene clip housings are UV-stabilized for longest life. Each clip contains two recessed, galvanized nails to be driven 3/8" into the wooden surface. RB Clips are available in a variety of colors and cable sizes, with discreetly colored nail heads that confirm size at a glance. RB Clips can be relied upon not only for their long lives and holding power, but for their long-term preservation of the cable's performance!
